Stages Power technology provides the most accurate results, ensuring the truest rankings in even the most competitive group display workouts. Now studio riders can benefit from the precision of training with power, because improvement begins with the right information.

The console and power meter use ANT+ and Bluetooth. Visit www.thisisant.com/directory for compatible products and apps.

STAGESPOWER

We believe that all cyclists should see nothing less than accurate, consistent data. From every ride.

- Cyclist sees both current & stage average power output (kJ, watts), RPM, speed, heart rate (if a compatible strap is worn), time, distance, and Kcal burned.

- Unique Stage average metric allows instructor to create endless challenging workouts.

- Simple layout for feedback at a glance.

- Transfers data for tracking and links with many iOS or Android via Bluetooth and ANT+™

- No batteries required.

- SIC2 console comes native on the Stages SC3 indoor bike.

The benchmark in accurate power measurement for indoor cycling.

- The only indoor bike featuring power technology that was developed and refined in the professional peloton.

- Data capture via Bluetooth® or ANT+™enabled sport devices (iOS and Android compatible).

- Power meter yields 2000+ hours battery life via 2 standard AA batteries.
